Previously there use to be a chrome extension to read on Desktop, but now it was removed.

So the best way on Desktop is to Copy the URL and open in incognito. Works most time

I am having a trick on how to read for free on Mobile. Works on Android & iOS.

Download pocket app(available for both OS)

iOS : [Pocket: Save. Read. Grow.](#)

Android : [Pocket: Save. Read. Grow. - Apps on Google Play](#)

Now, go to the article which you want to read and Click 'share' option. In that select 'Add to Pocket'. Then open pocket app and you will be able to read.

Works all the times for me.

Happy Reading!
