# How to Group Chat With Facebook Messenger

Talk with several Facebook friends simultaneously

[Share](#)[Pin](#)[Email](#)[PRINT](#)

Updated November 13, 2019

[Facebook Messenger](#) lets you chat with your Facebook friends using a dedicated mobile app that's separate from the primary Facebook app.

With it, you can not only send text, pictures, videos, and voice messages like a regular chat room, but also play games, share your location, and send/request money.

[Messenger](#) is extremely easy to use, so it doesn't take much at all to start a group message on Facebook.

## How to Group Chat on Facebook Messenger

Download [Facebook Messenger](#) if you don't already have it. You can get [Messenger on your iOS device](#) through the App Store (here), or on Android from Google Play ([here](#)).

### Create a New Group

01 Access the **Groups** tab in the app.

02 Choose **Create a Group** to start a new Facebook group.

04 Tap the **Create Group** link at the bottom when you're finished.

### Edit the Members of a Group

If you decide that you want to remove some members:

01 Open the group in the Messenger app.

02 Tap the group name at the top.

03 Scroll down a bit and then select the friend you want removed from the group.

04 Choose **Remove From Group**.

05 Confirm with **Remove**.

Here's how to add more Facebook friends to a group on Messenger:

**Note:** New members can see all the past messages sent within the group.

01 Open the group you want to edit.

02 Tap **Add People** at the very top.

03 Select one or more Facebook friends.

05 Confirm with the **OK** button.

Here's another way to add members to the Facebook group if you'd rather do so through a special share link. Anyone who uses the link can join the group:

01 Access the group and tap the group name at the very top.

02 Scroll down and choose **Invite to Group with Link**.

03 Select **Share Link** to create the link.

04 Use the **Share Group Link** option to copy the [URL](#) and share it with whoever you want to add to the group.

**Tip:** A **Disable Link** option will appear after you create the URL, which you can use if you want to stop inviting members this way.

## Leave a Facebook Messenger Group

If you no longer want to be part of a group you started or were invited to, you can leave like this:

01 Open the group you want to leave.

02 Tap the group name at the very top.

03 Go to the very bottom of that page and choose **Leave Group**.

04 Confirm with the **Leave** button.

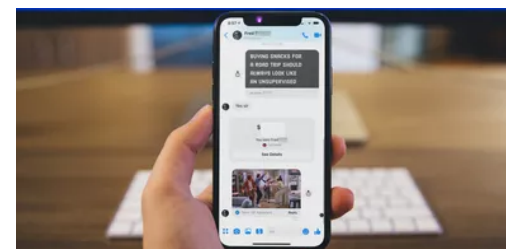

**Group** at Step 3 to simply stop getting notified of new messages but not actually leave the group or delete the chat.
