

Turn notifications on or off

You can set up Chrome to get notifications, like meeting reminders, from websites, apps, and extensions.

[Computer](#)

[Android](#)

[iPhone & iPad](#)

How notifications work

By default, Chrome alerts you whenever a website, app, or extension wants to send you notifications. You can change this setting at any time.

If you're browsing in [Incognito mode](#), you won't get notifications.

Allow or block notifications from all sites

1. On your computer, open Chrome.
2. At the top right, click More  > Settings.
3. At the bottom, click Advanced.
4. Under "Privacy and security," click Site settings.
5. Click Notifications.
6. Choose to block or allow notifications:
 - Block all: Turn off Ask before sending.
 - Block a site: Next to "Block," click Add. Enter the site and click Add.
 - Allow a site: Next to "Allow," click Add. Enter the site and click Add.

You can also [block any sites or apps from sending you notifications](#).
