**Firefox**

Switching from Chrome to Firefox

Switching from Google Chrome to [Firefox](#) is easy and risk-free! Firefox can automatically move bookmarks, passwords, history and other preferences from Chrome without deleting it or interfering with any of its settings. Give it a try.

1. **Don't remove Chrome [yet]...** We'll need it to import your Bookmarks, Passwords and History soon.
2. **Download and install Firefox** from <https://www.mozilla.org/firefox/new/>.
3. **Exit Chrome** if you have it running.

4. **Open your newly-installed Firefox.** The import tool will pop up.

- If it doesn't, click the , click **Bookmarks**, go down to the bottom and click **Show all Bookmarks**, and lastly, click **Import and Backup** and select **Import Data from another Browser** from the menu.

5. The import tool will look similar to this:

6. **Choose Chrome in the Import Settings and Data window.** In the next screen, choose the things you want to import. Follow the prompts and Firefox will take care of the rest.
