

calling C# function immediately file is selected in fileupload

[Ask Question](#)

11

I have a web form(asp.net) which I'm using to upload file. In current situation if a user choose a text file from their computer they have to click a buttton to upload the text in a box. I'm trying to find a way to skip the step with a button pressing.

How to call a C# function when the file is selected from user ?

You need to use Javascript. – [SLaks](#) Mar 10 '13 at 19:28

your question is not clear, you trying to find a way to do skip what? – [Arbaaz](#) Mar 10 '13 at 19:29

can u elaborate i am not familiar with javascript –
[Arjun Chiddarwar](#) Mar 10 '13 at 19:29

@Arbaaz i am trying to make user skip clicking button after selection file for loading text in textbox (from the file)

elaborate more, are you using ajax? if you want to just start file uploading when you select a file then you should try using some JQuery on UI and HttpHandler on Server side. –

1 Answer

Try this

31

```
<asp:FileUpload ID="FileUpload01" ClientIDMode="Static"
runat="server"/>
```

in code behind Page_load event

```
if (IsPostBack && FileUpload01.PostedFile != null)
{
    if (FileUpload01.PostedFile.FileName.Length > 0)
    {
        FileUpload01.SaveAs(Server.MapPath("~/Images/") +
FileUpload01.PostedFile.FileName);
        imguser.ImageUrl = "~/Images/" + FileUpload01.Poste
    }
}
```

- 2 This is great and exactly what I was looking for. I do have one issue though. When it posts back the FileUpload textbox is empty. I put a breakpoint in the nested if statement and found
