

horizontal list view in asp.net

[Ask Question](#)

Here is my code for listView and Data Pager ,

1

1

```
<asp:ListView runat="server" ID="PageHorizon">
  <LayoutTemplate>
    <asp:Placeholder ID="itemPlaceholder" runat="server">
    </asp:Placeholder>
  </LayoutTemplate>
  <ItemTemplate>
    <table width="100%">
      <tr>
        <td width="25%">
          <img src='<#Eval("ImagePath")%>' alt="Single Image"
            width="64px" height="64px" />
        </td>
      </tr>
    </table>
  </ItemTemplate>
</asp:ListView>
<br />
<hr />
<asp:DataPager ID="DataPager1" runat="server" PagedControlID="PageHorizon"
  PageSize="3">
  <Fields>
    <asp:NextPreviousPagerField ShowFirstPageButton="True"
      ShowNextPageButton="True" />
    <asp:NumericPagerField />
    <asp:NextPreviousPagerField ShowLastPageButton="True"
      ShowPreviousPageButton="True" />
  </Fields>
</asp:DataPager>
```

By this code , `listView` show images vertically , I want to show my images horizontally.
How can I change the orientation of `listView` ?

`c#` `asp.net` `listview` `datapager`

If you just want to show the images in a single row, you can just put them in the columns of a single row. Try rewriting the listview markup as follows (move `table` , `tr` markups into `LayoutTemplate`):

```
<asp:ListView runat="server" ID="PageHorizon">
  <LayoutTemplate>
    <table>
      <tr>
        <asp:PlaceHolder ID="itemPlaceholder" runat="se
      </tr>
    </table>
  </LayoutTemplate>
  <ItemTemplate>
    <td>
      <img src='<%#Eval("ImagePath")%>' alt="Sir
      width="64px" height="64px" />
    </td>
  </ItemTemplate>
</asp:ListView>
```

I used this code once

1

```
<asp:ListView ID="listview1" runat="server">
  <ItemTemplate>
    <table style="display: inline-block;">
      <tr>
        <td>
          <asp:Image ID="Image1" runat="server" :
%>" CssClass="max75" />
        </td>
      </tr>
    </table>
  </ItemTemplate>
</asp:ListView>
```

give it a shot

0

```
<ListView.ItemsPanel>
  <ItemsPanelTemplate>
    <StackPanel Orientation="Horizontal" />
  </ItemsPanelTemplate>
</ListView.ItemsPanel>
```

This is asp.net, no WrapPanel :(– Eirik H May 8 '13 at 5:52

Ideally should be able to rotate HTML element (img in your case) by a specified degree. I seen something similar which rotate text through CSS and hope it make no difference in case of img since both are html elements

```
/* for firefox, safari, chrome, etc. */  
-webkit-transform: rotate(-90deg);  
-moz-transform: rotate(-90deg);  
/* for ie */  
filter: progid:DXImageTransform.Microsoft.BasicImage(rotat:
```
