Hi i found this below solution with ScriptManager

```
string message = "alert('Hello!')";
ScriptManager.RegisterClientScriptBlock((sender as Control), this.GetType(), "alert",
message, true);
```

the issue is i am using ToolkitScriptManager

How can make the code work with ToolkitScriptManager

```
<%@ Register Assembly="AjaxControlToolkit" Namespace="AjaxControlToolkit"
TagPrefix="cc1" %>
<cc1:ToolkitScriptManager ID="ToolkitScriptManager1" runat="server">
</cc1:ToolkitScriptManager>
```

c#   asp.net   asp.net-ajax   updatepanel

1 Answer

It will work with ToolScriptManager also(only if you have **PostBack** trigger)

3

```
 Response.Write(@"<script Language=""javascript"" >alert('
 </script>");
```

✔ Code below works with both ToolScriptManager and ScriptManager(For **Async Trigger** also)

```
String TransferPage;
TransferPage = "<script>alert('Your Message')</script>";
ScriptManager.RegisterStartupScript(Page, Page.GetType(),
```
